THAKSHITH B K

Software Developer | Python Backend Developer

PROFESSIONAL SUMMARY

Software Developer with 2+ years of professional experience in Python, backend development, automation, and MySQL. Built production ready internal tools, AI-powered workflows, and backend applications that improved operational efficiency by 80%. **Achieved 93.99% in the Python Hands-On Assessment and 70.46% overall in the TCS iON NQT – IT assessment.** Passionate about developing scalable software solutions and seeking Python Backend Developer opportunities.

Portfolio: https://thakshith21.github.io/Portfolio/

SKILLS

- **Programming Languages:** Python, JavaScript, PHP
- **Frontend:** HTML, CSS, JavaScript, jQuery
- **Database:** MySQL
- **Cloud:** AWS (EC2, IAM, EFS)
- **Tools & Platforms:** Git, GitHub, Linux (WSL), VS Code
- **Core Skills:** Backend Development, Automation, Database Integration, API Consumption, Code Evaluation, Performance Optimization, Debugging, Workflow Automation, Test Deployment
- **Soft Skills:** Problem Solving, Team Collaboration, Communication

WORK EXPERIENCE

Software Developer

Oliveboard Comptech Pvt. Ltd. | **July 2024 – Present**

- Built Python/PHP/MySQL backend applications and automation tools that improved operational efficiency by 80%.
- Managed the end-to-end test publishing lifecycle: setup, configuration, data upload, deployment.
- Delivered internal tools (Smart Interview Scheduler, AI Translation & Verification Platform, Template Automation Tool, Document Formatting Validation Tool, AI Tutor).
- Debugged production issues, optimized backend logic, and collaborated with cross-functional teams.

Backend & Front-End Development Intern

Oliveboard Comptech Pvt. Ltd. | **Mar 2024 – Jun 2024**

- Developed backend modules using Python to measure execution time and memory usage of user-submitted programs.
- Built the Execution Performance Tracker for real-time code performance evaluation.
- Developed the Code Template Generator to automate server-side code snippet generation for multiple programming languages.
- Built small-scale web applications and internal tools using Python, MySQL, HTML, CSS, JavaScript, and jQuery.
- Collaborated with the development team to debug applications, implement new features, and improve existing workflows.

Network Engineer Intern
Quadgen (A Mastec Company) | **Jun 2023 – Jul 2023**

- Worked with RF, Ericsson, Nokia, and Small Cell teams on network planning and optimization activities.
- Gained hands-on experience with industry tools including Quest, PuTTY, CLI, and IBWave.
- Learned DAS and Small Cell planning workflows while collaborating with cross-functional engineering teams.

PROJECTS

Server-Driven UI & Dynamic Page Generator | **Sept 2026 - Present**

- Building a Python and MySQL Server-Driven UI backend that serves dynamic webpage layouts from JSON schemas, so layouts can change instantly without frontend changes.
- **Tech Stack:** Python, MySQL, JSON

AI Translation & Verification Platform | **Apr 2026 – Jul 2026**

- Built an AI Translation & Verification Platform to automate question translation, reviewer verification, priority-based task allocation, and real-time progress tracking..
- Built reviewer dashboards with priority-based task management and real-time verification metrics.
- **Tech Stack:** Python, PHP, MySQL, LLM Integration, JavaScript

AI Tutor | **Jan 2026 - Mar 2026**

- Developed an AI-powered learning platform with dynamic content rendering and backend-driven responses.
- Integrated AI services and database workflows for personalized learning.
- **Tech Stack:** Python, MySQL, HTML, CSS, JavaScript, Gemini API

Smart Interview Scheduler | **Oct 2025 – Dec 2025**

- Built an automated scheduling system that generated conflict-free interview slots based on faculty availability and predefined constraints.
- Eliminated scheduling overlaps and streamlined recruitment workflows.
- **Tech Stack:** Python, MySQL, HTML, CSS, JavaScript

Study Stream | **Jul 2025 – Sep 2025**

- Developed a backend-driven educational video streaming platform with progress tracking and content management.
- **Tech Stack:** Python, MySQL, HTML, CSS, JavaScript

Document Formatting Validation Tool | **Oct 2024 – Dec 2024**

- Engineered rule-based validation algorithms that scan documents and flag layout, style, and structural errors.
- Reduced manual review effort and sped up quality control workflows.
- **Tech Stack:** Python, PHP, JavaScript

EDUCATION

Bachelor of Engineering (B.E.) – Electronics & Communication Engineering
Rajarajeswari College of Engineering, Bangalore
2019 – 2023 | CGPA: 9.0/10

ACHIEVEMENTS

- TCS iON NQT - IT: 93.99% in Python Hands-On Assessment; 70.46% overall.
- **TCS iON NQT scorecard** : **View Scorecard**
- Improved operational workflow efficiency by 80% through Python-based automation.
- Secured the KSCST Innovation Grant for the AES-256 FPGA research project.
- Participated in the Smart India Hackathon (SIH).
